

Traffic Safety

This workbook can help you but you still need to read the merit badge pamphlet.

This Workbook can help you organize your thoughts as you prepare to meet with your merit badge counselor

Merit Badge Counselors may not require the use of this or any similar workbooks.

You still must satisfy your counselor that you can demonstrate each skill and have learned the information. You should use the work space provided for each requirement to keep track of which requirements have been completed, and to make notes for discussing the item with your counselor, not for providing full and complete answers.

If a requirement says that you must take an action using words such as "discuss", "show",

"tell", "explain", "demonstrate", "identify", etc, that is what you must do.

No one may add or subtract from the official requirements found on Scouting.org.

The requirements were last issued or revised in 2022 • This workbook was updated in May 2022.

			Switch Location	
		b.	Using a vehicle th	at you have access to, demonstrate how to check the vehicle's tire pressure
			and where to loca	te the correct tire pressure rating.
			Explain why prope	er tire pressure is important to the safe operation and fuel economy of the vehicle.

Traffic	Safety	Scout's Name:
	C.	Explain why proper tread depth is important to safe driving.
	d.	On the same vehicle you checked the tire pressure on, demonstrate a method to check for adequate tire tread depth. Explain issues that might affect the driver's ability to see through the front, rear, and side windows.
Ш	u.	Explain issues that might affect the driver's ability to see through the front, real, and side windows.
		Demonstrate with a smear-and-clear test if the windshield wiper blades will clear the windshield completely or need to be replaced.
		Describe instances in good and bad weather when windshield wipers are important to safe driving.
4.		the following:
	а	In a location away from traffic hazards, measure with a tape measure - not in a car - and mark off with stakes the distance that a car will travel during the time needed for decision and reaction, and the braking distances necessary to stop a car
		traveling 30, 50, and 70 miles per hour on dry, level pavement.

	Discuss how environmental factors such as bad weather and road conditions will affect the distance.
b.	As a driver, describe the difference in nighttime visibility between a properly lit bicycle and rider (or a pedestrian) wearing reflective material and a bicycle and rider with no lights (or a pedestrian) dressed in dark clothing, without reflective material.
C.	Explain how color and shape are used to help road users recognize and understand the information presented on traffic and roadway signs.
